

**CASE STUDY**

**Increased Security and Compliance**

**CHALLENGES**

- Increased demand in compliance
- Growing cybersecurity threat
- Reducing cost and complexity of managing multiple security products

**KEY TECHNOLOGIES**

- Microsoft 365 Business Premium
- Windows Defender for Office 365
- Windows Defender for Endpoint
- Conditional Access Policies
- 24/7 Suspicious Activity Monitoring

**CUSTOMER AT A GLANCE**

Definitive Capital Management was established in 2002 and is built on the traditional international private banking model. Definitive is accredited with the highest level of regulatory approval and has strategic alliances in both South Africa and Europe.

**OVERVIEW**

Definitive Capital Management operate in the Financial segment of the market, which is extremely compliance driven. Client trust is extremely important to Definitive, and as such they wanted to ensure they had the necessary security controls in place to secure their clients' data.

**SOLUTION**

Definitive already made use of some of the Microsoft 365 online tools such as Exchange Online. By migrating all users to Microsoft 365 Business Premium, TECHTRON was able to significantly increase security controls through a consolidated security stack combined with a third party 24/7 Security Monitoring tool to find and track suspicious activity. With our help, Definitive was able to drastically improve their overall Cybersecurity profile.
