

### CHALLENGES

- Legacy Pastel application
- Constrained budget
- Security

*Union of Orthodox Synagogues*

### KEY TECHNOLOGIES

- Pastel
- Azure Environment
- Secure VPN
- Disaster Recovery

### CUSTOMER AT A GLANCE

The Union of Orthodox Synagogues (UOS) is the coordinating organisation of Orthodox Synagogues throughout South Africa. It is the largest Jewish religious organisation in the country catering to the needs of 95% of the Jewish community in South Africa.

### OVERVIEW

UOS is a key trusted non-profit organization in the Jewish community. The community rely heavily on the services of the UOS as well as their confidentiality in sensitive matters. The UOS were running Pastel on an old server on-site, which needed to be replaced, and being an NGO the budget was extremely restricted.

### SOLUTION

TECHTRON was able to migrate the Pastel application to a cost-effective hosted cloud server in the Azure data center. This allowed UOS to remove the old on-site server, enable remote workers and beat load shedding issues, while improving security, access and disaster recovery – all within budget.
